Objective

To join a highly professional team in the field of Project / Construction management as a Sr. Project Engineer & Construction Manager to utilize my technical knowledge and professional abilities within a dynamic and progressive environment where enthusiasm, dedication and the ability to manage tasks effectively are pre-requisite in driving the organization

Professional Experience:

Key Responsibilities:

Main responsibility at different Projects to manage all Disciplines (Civil, MEP & Process) and Subcontractors to achieve specified quality and to complete the project within budget and planned time.

- Deep involvement in Risk, Quality, Safety, Construction and Project management.
- Lead the team for preparation of Construction methodology, Method Statements, Project Quality Plan, Safety Plan, Schedules and compliance with Project objectives.
- Ensure that systems and procedures for carrying out the projects are properly applied throughout the project including HSE requirements as per international and local regulations.
- Proactively identifying and working to resolve any issues that may jeopardize cost and schedule targets.
- Liaising with Project, Construction Managers to ensure proper Project Controls measures are in place and that cost and schedule controls have been implemented.
- Provide leadership of direct reports covering Planning, Scheduling, Cost Control, Estimating and Change Management.
- Development, maintenance and status reporting of the overall schedule, budget and cost forecast.
- Establishing, maintaining and reporting on the status of the cost and schedule baselines including the preparation of monthly reports and special progress reports.
- Developing and maintaining an overall Project co-ordination and control schedule and cost forecast and report regularly on their status relative to the Project Cost/Schedule baselines.
- Ensure the review and approval of subcontractor's project control procedures and compliance with the Contract Coordination Procedures.
- Establish, review, and monitoring Risk Management Plan (Risk Register) and efficient delivery to the Stakeholders.
- Providing strategic advice in the control of existing contracts and development of new contracting plans for site
- Follow up preparation and approvals for all preconstruction submittals (i.e. material submittals, planning & control procedures, shop drawings, method statements, and inspection & testing plans ITP etc.)
- Prepare response to claimant statement and coordinate with law firms for ICC Arbitration case.
- Make sure that As-Built drawings, vendor and equipment warranties, O&M Manuals, Spare Parts and Training Programmes are submitted to Consultant / Client for their review and approval.
- Attend Technical meetings, weekly progress meetings, Quality meetings,

Highlights

- More than 14 years experience in the field of Project / Construction Management, Control & compliance with Quality and HSE requirements, and Construction Supervision, of projects like Residential, Commercial, Multi Purpose Buildings, villas, Industrial Projects, District Cooling Plants, Utilities, Industrial amenities.
- Strong experience in Project Management and decision making. Proven record for maintaining Schedules, Quality Control, Safety, Handing-over and Close-out. Direct, clear and confident in managing projects worth multi-million-dollar budgets.
- Dedicated professional attitude, team player and committed to getting the job done within budget and on time.
